

## DTR 650 Instructions

**To turn on:** Press the **power button**

**To turn off:** Hold the **power button** for 2 seconds.

**Using the Radio:** Simply scroll up or down using the **navigation keys** to select the desired channel. Push and Hold the **PTT Button** on the side of the radio and listen for the "Chirp Sound" before speaking. Note: This is the go-ahead and speak signal, wait for it, or you will cut off the start of your conversation, then Release the **PTT Button** to listen for a response.

**Private call:** if programmed is accessed by the contacts menu located on the left **option key**. Select the name from the list, press and Hold the **PTT Button**, after the go-ahead "chirp" start your private conversation. The person you called just needs to press and Hold their **PTT Button**, to respond back to you.

### Using Head Phones / Speaker Mics / Surveillance Kits

**Shut off radio**, then insert plug straight and firmly into the **Audio Jack**, turn the radio back on. Set volume at a safe level before using Accessories to prevent hearing/ear damage.

Note: if you experience a problem accessory or keyed up radio, shut it off disconnect and repeat this procedure.

### Charging the radio

Place the radio into the supplied rapid charging unit. The LCD display on the radio will light indicating the unit is charging. Remove the radio and check the battery level indicated on the display to determine if fully charged.

### Charging Spare Batteries

Place the battery into the edge of the charger cup (note the electrical contacts). Red indicates charging, Green indicates battery is fully charged.

**Note:** At least 2-Radios must be **Turned On** and on the same channel to be able to talk. If there are no other units on your channel or within range, then the radio will Bonk when you try to talk. This is a good thing, because if your call goes through, you know that someone is on your channel with their unit powered on within range of you, and they received your call.
